CIRCLES

Maria Jeglinska

The designer

Maria Jeglinska was born in France in 1983. A graduate of the ECAL's industrial design program (2007), she has worked for Galérie Kreo, Paris, and in the office of Konstantin Grcic in Munich.

At the end of 2009, she opened her own agency in both London and Warsaw, working on industrial design projects (furniture, lighting, products), exhibition and spatial design, writing and also research projects. Convinced that research can question and generate new forms of responses and services within today's culture, in 2010 she was a co-

founder of the EESTT (Eastern European Study Think Tank), a working group centring on the countries of Eastern Europe.

Concept & technical description
